Axil Scientific
YOUR RESEARCH IS OUR BUSINESS

UP TO 10% OFF All Products
Promotion valid from 24 Aug – 31 Oct 2026

Tokyo Chemical Industry (TCI) is a renowned Japanese company that specializes in the production and distribution of a wide range of chemicals, particularly organic laboratory chemicals and reagents.

High Purity and Quality
TCI's products are known for their high purity, essential for precise and reliable results in scientific research and industrial processes.
Innovation
Invests in research and development to continually expand and improve its product offerings.
Comprehensive Product Range
Provides an extensive array of chemicals, catering to various industries and research areas, including pharmaceuticals, biotechnology, material sciences, and more.
Custom Synthesis Services
Offers custom synthesis services to meet the specific needs of researchers and companies, providing tailored solutions and unique compounds.
Technical Support
Provides robust technical support and detailed product information.

Product Categories

Organic Reagents
Includes a wide variety of chemical reagents for organic synthesis, research, and development.

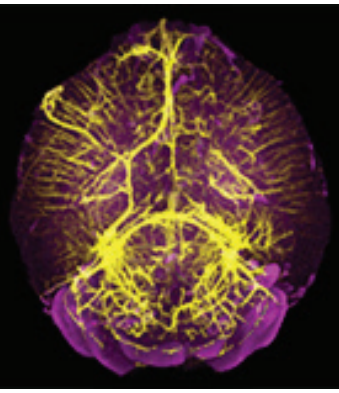

Inorganic Chemicals
Offers various inorganic substances, including salts, metals, and metal complexes.

Functional Materials
Includes materials for specialized applications, such as electronic materials, catalysts, and more.

Analytical Reagents
High-quality reagents for analytical chemistry, including chromatography and spectroscopy.

Animal Tissue-Clearing Reagent "CUBIC"

- **CUBIC-B:** Reagent optimized for bone clearing
- **CUBIC-HL:** Reagent optimized for highly fatty tissues
- **CUBIC-P:** Perfusion reagent optimized for tissue-clearing
- Preserve the fluorescent protein signals

TCI LIFE SCIENCE

Mouse Whole Body Clearing

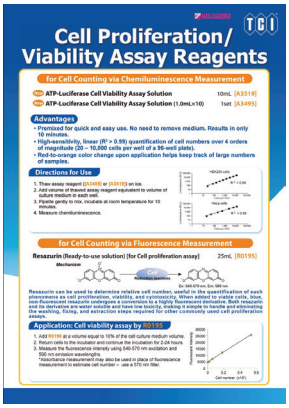

Figure 1. Whole-body clearing (Left), Whole-body clearing with propidium iodide staining (Right)
